

STEM CLUB

ENGINEERING

With emphasis on Robotics and Engineering

Grades: 2-6 at GCA By All Around Learning Center

During the first part of the semester, students will explore fun engineering projects. They will be building skyscraper structures, exploring how electrical circuits work and how light can be incorporated into their designs. Flying rockets and drones around their city will be an exciting challenge.

During the second part of the semester we will progress to robotics where the students will design and build LEGO Mindstorms Robots. They will have the chance to create their own vehicles, animals, humanoids, and more...

We hope to demonstrate the importance of STEM to our students through amazing hands-on activities.

Time & Cost

TIME: Wednesdays 3:20-4:20 pm

DATES: Aug 26 - Nov 18, 2026

COST: \$245 for the Fall Semester

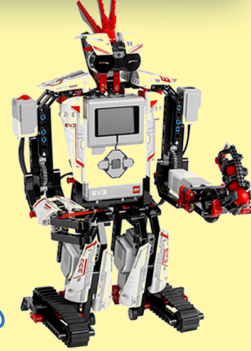

(No club on holidays and early release days)

DRONES
